## Further Tests or Treatment Appointment Letter

Dear Sir/Madam,

### Information

Thank you for choosing to see me at The London Independent Hospital, Spire London East, The London Clinic, Wellington Hospital, Harley St, LycaHealth, The New Victoria Hospital, The Cromwell Hospital or HSSH. Further to your recent outpatient consultation, I am writing to confirm your appointment for tests, injections or surgery. This letter sets out some important information that I am required by law to provide to you in relation to your tests, injections or surgery. This is for your information only and is not a bill.

### *Reason for tests, injections or surgery*

As discussed during our consultation, I recommend that you have either blood tests, xrays, MRI scans, ultrasound scans, CT scans, arthrograms, nerve tests, physiotherapy, injections or surgery. The purpose of this is to find the cause of your problem, or to treat the condition.

### *Consultant Fee Estimate*

My estimated fee for these depends on the actual test or treatment.  
I receive no fee for the vast majority of these tests, or physiotherapy.

However if I perform an injection or surgery I will get a fee which is dependant on what I have previously agreed with your insurance company. **Normally you will NOT need to pay anything for this, and everything is covered by your insurance company. However, often patients have to pay me an excess on their policy which their insurance doesn't cover.**

**Please always doublecheck with your insurance to ensure they cover each test or treatment I advocate, before having it done.**

However my normal fee for a standard injection if you are paying yourself is £200- £400 depending on what is done and where the injection occurs. However there maybe other charges the hospital charge you separately. These extra charges from the hospital may include charges for the drugs used and use of the room also. You need to ensure you know all these charges before proceeding

My fee for surgery is dependant on what operation I am advocating. **Again, normally you will NOT need to pay anything for this, and everything is covered by your insurance company. However, often patients have to pay me an excess on their policy which their insurance doesn't cover.**

**Please always doublecheck with your insurance to ensure they cover each test or treatment I advocate, before having it done.**

If you are paying yourself my approximate fee is –  
£800 - £1200 – Fracture Fixation (depending on the fracture and its complexity).  
£400- £600 – Removal of Metalwork  
£500 – Fasciotomy of Limb  
£250-£500 – Nerve Release  
£300- £500– Drainage of joint  
£1000 - £1200 – Shoulder/Elbow/ Knee Replacement  
£1200 - £1400- Revision Shoulder/Elbow/Knee Replacement  
£750 - £900 – Repair/Reconstruction of Acromioclavicular joint  
£700 - £1200 – Arthroscopic Shoulder/Elbow/Knee/Ankle Stabilisation  
£700 -£1200– Open Laterjet – Bony Shoulder Stabilisation  
£750 -£1200 – Revision Shoulder/Elbow/Knee Stabilisation  
£800 – Arthroscopic surgery for Joint Stiffness  
£800 – Arthroscopic surgery for Shoulder/Elbow/Knee/Ankle  
£1000 - £1200 – Arthroscopic Rotator cuff Repair  
£800 – Biceps fixation  
£650 – Excision of Radial Head  
£1000 – Tibial Osteotomy  
£700 - £1000 – Patella Stabilisation  
£800 – Arthroscopic Meniscal Repair  
£1000 – Knee Ligament Recontruction  
£1200– Revision Knee Ligament Reconstruction  
£1200 – MultiLigament Reconstruction  
£800 – Osteochondral Grafting - Fixation

Other consultants maybe also involved in your tests and/or treatment, but their fees are not included in the above estimate. For example if you have an Ultrasound, Xray, CT scan, MRI scan or arthogram or an injection, the consultant radiologist who reports this or performs the injection will also charge a fee. Again normally this is covered by your insurance, however it may not be and so you will need to double check.

For information on their fees, please contact the Xray Department of the Hospital where the test is performed, or my secretary for some help ([info@theolympiaclinic.com](mailto:info@theolympiaclinic.com) – 02036332288)

If you are having a surgical procedure, an anaesthetist will also be involved in your care.

In addition to the above estimates, there will be an anaesthetist's fee that will be determined by the anaesthetist and charged to you, or your private medical insurer, separately.

### ***Services and Fees not included in the estimate***

Please note that the above estimates do not include other treatment that may be required if any unforeseen complications arise during surgery. For example, costs associated with further treatment, additional care, or a longer than anticipated stay in the hospital.

### ***Hospital Fees***

Please note that above estimates do not include any fees that the hospital may charge. For information on Hospital or Clinic fees, please contact the hospital administration team, where you will be having surgery or tests, [or my secretary for some help ([info@theolympiaclinic.com](mailto:info@theolympiaclinic.com) – 02036332288)].

### ***Private Medical Insurance***

If you have private medical insurance, please contact your insurer before your test and/or treatment, to check whether this is covered by the terms of your policy

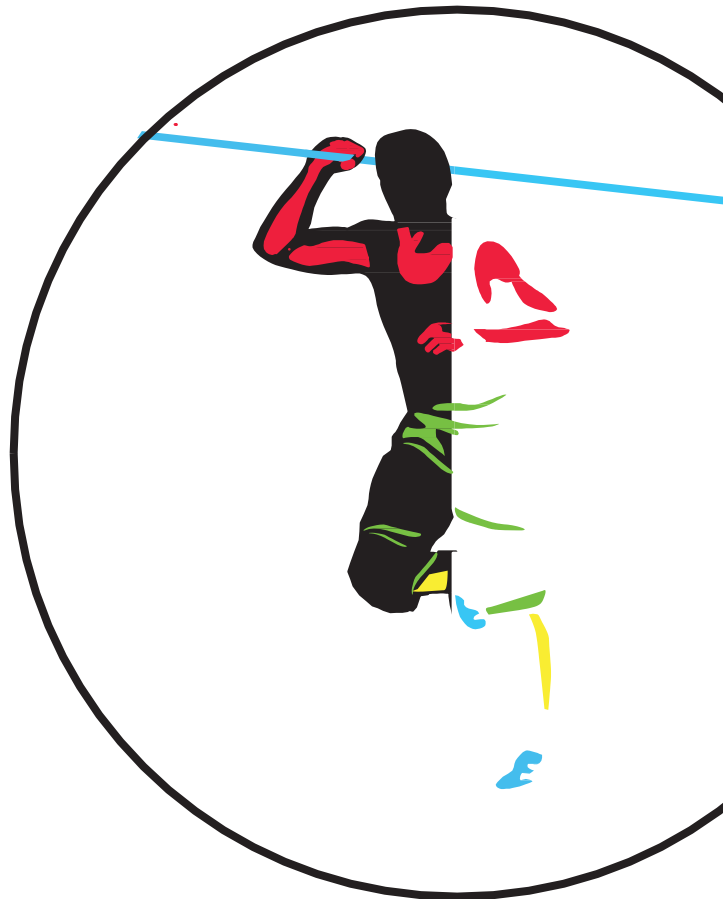

Please note you are responsible for any fees not covered by your insurer.

### ***Quality Information***

You can compare independent information about the quality of private treatment offered at the hospital and other private healthcare providers from the Private Healthcare Information Network (PHIN) website: [www.phin.org.uk](http://www.phin.org.uk).

Yours sincerely,

Mr K.A. Ziali Sivardeen
